-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1655

Applicant's election without traverse of Group I, claims 1-11, in the reply filed on 4/14/06 is acknowledged.

The IDS's received 1/15/04, 5/24/04 and 12/15/04 have been entered and claims 1-11 are considered here.

Claims 1-11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The claims are directed to screening for an agent to reduce wrinkles. The specification teaches in the examples that p21 knockout mice get more wrinkles than average when exposed to UVB. No assay, tested compounds, data regarding p21 for any compound or any compound found by any method that reduces wrinkles is shown in the specification as originally filed.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Each of the following applies in all occurrences.

Art Unit: 1655

There are many instances of lack of antecedent basis in the claims, for example in claim 1 line 4, "the p21 signal", in claim 2 line 1, "the effect". In claim 1 line 6, "the ability of a test agent" is unclear because compounds have activities, not abilities. In claim 6 last line, "it" is unclear as to what may be intended. In claim 11 "UVB induced wrinkles" is queried as to how one would know if a wrinkle were or were not UVB induced.

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Weinberg (Crit Rev Oral Biol Med) teaches epithelial tissues and p21.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ralph Gitomer whose telephone number is (571) 272-0916. The examiner can normally be reached on Monday - Friday.
